***Playing Drill 3: Improve Putting Accuracy Using 3 Reference Points  
Alignment Method (Marker/Trainer)***

---

**Objective:** To allow you to get better understanding of your putting path by gaining a wider view (compared to a single line) of the putting path utilizing 3 reference points method.

Step 1: Determine your probable putting path by observing the ball from several different perspectives noting slopes in the putting green.

Step 2: Slide the Marker/Trainer under the ball with the legs pointed at the probable putting path until the ball touches the center point.

Step 3: Pick up the ball.

Step 4: Rotate the Marker/Trainer, in place, until the legs are pointing at the outside edges of the probable putting path and the center point is pointing down the putting path.

Step 5: Replace the ball with the ball alignment line parallel to the Marker/Trainer legs. The ball alignment line is now pointing down the correct putting path.

Step 6: Using the side legs, pick up the Marker/Trainer and putt.
